

Cycle4green Liner Recycling

- is a recycling specialist with **full focus on recycling release waste papers**
- is an acknowledged pioneer in release liner recycling since 2009
- operates widely **throughout Europe**
- covers recycling service at ca. 300 locations
- partners in recycling with Lenzing Papier GmbH in Austria since 2010
- is a European solution with a **mission to care for our environment**

Recycling partner

Lenzing Papier GmbH, Austria

- Long tradition in paper production **since 1892**
- Capacity **100 000 tons of paper per year** ; focus on various paper products with recycled content
- Product range with several **100% recycled papers** for printing and packaging
- **175 people** ; turnover **94 Mio Euro**
- Strong environmental certification

Care for our environment

- recycling improves carbon footprint of label liner
- less material consumption through recycling

Use Recycled Products

- resource for recycled papers
- closing the loop from waste back to recycled release paper

Reduce Waste

- release liners are still largely incinerated or landfilled
- 400 000 tons of label liners consumed in Europe annually

Reduce Costs

- savings in waste management cost
- material recovered in material value chain

What can be recycled?

We recycle **sorted release waste papers**

- known as release / glassine / label backing paper
- white, yellow, honey and blue shades can all be accepted
- glassine and clay-coated kraft (CCK) can be recycled

Sorted release paper **must be free of**

- any plastic material such as PET, PP, wrappings etc
- labels and PET-liner must be removed
- other non-paper materials as in Material Specification

Labels / adhesives

PET-liner / plastics

Corrugated / card board

Cores

Packaging and storage

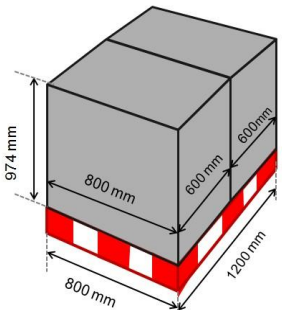

- Required storage capacity is **reviewed based on location, volumes and customer conditions**
- Storage area for 15-32 pallets is typically needed
- Pallets need to be kept indoors in dry conditions
- Pallets need to be secured with stretch-wrapping and/or pallet strap for transport
- Loose liner material (edge trim, sheets) must be compressed by shredding or bale pressing

Pallet box

Dimension: 60x80x97cm

Target weight: 500 kg

Two boxes on one EUR-pallet

Octabin box

Dimension: 100x120x170cm

Target weight: 700-900 kg

Bales

Dimension: 60x80x150cm

Target weight: 500-700 kg

Mill size bales

Documents required in transport of waste paper in EU (EU Reg. 1013/2006 Art. 18) :

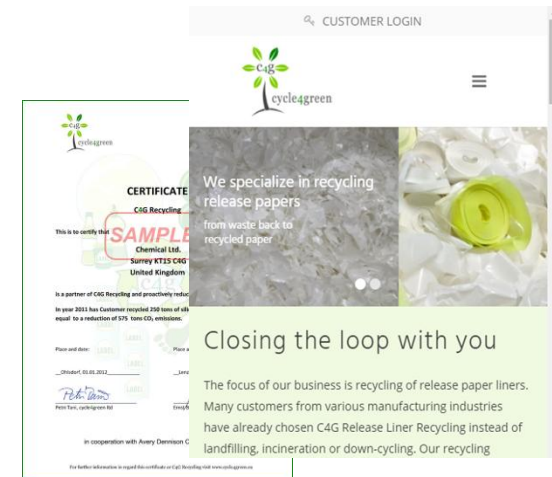

- **EU waste transport agreement** signed between companies organizing waste shipments
- **Annex VII (EU Waste Note)** carries consignment information, waste codes and delivery dates
- **CMR documents** : standard freight document for international shipments
- Documents for Customs Clearance (Switzerland)

Order handling through C4G Customer Portal:

- **order management and delivery tracking** is available at customer portal
- order confirmations and EU Waste Transfer Notes generated for shipments
- access at www.cycle4green.eu / Customer Login

Environmental certificates are issued once year:

- **recycled quantity** is confirmed
- environmental impact on carbon emissions is estimated
